Hyderabad, Telangana

Education

Malla Reddy Institute of Technology and Science, Hyderabad <i>B.Tech in CSE (Artificial Intelligence and Machine Learning)</i>	2023 – Present CGPA: 8.28/10
S R Junior College, Hyderabad <i>Board of Intermediate Education</i>	2021 – 2023 75.5%
Mount Carmel High School, Hyderabad <i>Board of Secondary Education</i>	May-2021 CGPA: 9.8/10

Skills

Programming Languages: Python, JavaScript, SQL, C
Web Development: HTML, CSS, React.js, Next.js, Node.js, TypeScript, Tailwind CSS
AI/ML: Scikit-learn, Pandas, NumPy, OpenCV, Convolutional Neural Networks (CNN), Large Language Models (LLMs)
Database: PostgreSQL, MySQL
Tools & Platforms: Git, GitHub, VS Code, Vercel, GitHub API, Starshot Annotation Platform
Core Subjects: Data Structures Algorithms, DBMS, Operating Systems, Object-Oriented Programming (OOP)
Soft Skills: Leadership, Teamwork, Communication, Problem Solving

Experience

Student Tribe <i>AI Annotation Specialist Intern</i>	Jun 2026 – Jul 2026 <i>Starshot.scilliance.com</i>
– Annotated and validated multimodal datasets (text, image, audio, and video) for AI model training using the Starshot annotation platform. – Executed quality assurance by reviewing pre-annotated data, correcting inconsistencies, and ensuring compliance with annotation guidelines. – Supported machine learning model development by delivering accurate, high-quality labeled datasets to AI engineering teams. – Suggested improvements to annotation workflows and documentation, contributing to greater consistency and processing efficiency.	

Academic Projects

News Article Classification using ML & NLP <i>Technologies: Python, Machine Learning, NLP, Scikit-learn, NLTK</i>
– Engineered an NLP-based text classification system to categorize news articles into domains such as Sports, Politics, Technology, and Business. – Executed text preprocessing techniques including tokenization, stop-word removal, stemming, and TF-IDF vectorization for improved model performance. – Evaluated and evaluated machine learning algorithms to automate news categorization with enhanced classification accuracy and efficiency.
Spammer Detection & Fake User Identification <i>Technologies: Python, Machine Learning, JavaScript, MySQL</i>
– Deployed a machine learning-based system to identify spam accounts and fake users on social networking platforms. – Extracted behavioral, temporal, graph-based, and content features to detect malicious profiles and suspicious activities. – Applied classification algorithms to improve spam and fake user detection accuracy.
Diabetes Prediction using Machine Learning <i>Technologies: Python, Scikit-learn, Pandas, NumPy</i>
– Improved a predictive machine learning model for early diabetes risk identification using healthcare datasets and comparative algorithm analysis.
Driver Drowsiness Detection using CNN <i>Technologies: Python, CNN, OpenCV</i>
– Advanced a real-time deep learning-based driver drowsiness detection system to monitor eye movement and identify fatigue.

Certifications

Infosys Springboard: HTML5 & CSS3 Advanced, Programming in C
Reliance Foundation Skilling Academy: Frontend Web Development, AI / Machine Learning Engineer
Deloitte: Cyber Job Simulation

Achievements & Leadership

- Selected for **Level 2 Evaluation** in **Smart India Hackathon (SIH) 2023** for the project *Diabetes Prediction using Machine Learning*.
- Received a **Certificate of Appreciation** from **NxtWave** for demonstrating leadership in organizing and executing the workshop “AI for Students: Build Your Own Generative AI Model” on March 22, 2024.
